Education

Scaler

Specialisation in Data Science and Analytics

Aug 2024 – Dec 2026

Bangalore, Karnataka

Maulana Abul Kalam Azad University Of Technology

BBA

Aug 2019 – July 2022

kolkata, West Bengal

Relevant Coursework

- Data Analytics
- Python
- Artificial Intelligence
- Excel
- Power Bi
- Database (SQL)
- Machine Learning

Experience

Physics Wallah

Associate

Nov 2024 – Present

Bangalore, Karnataka

- * Led academic operations across centers, analyzing workflows and learner data to improve program delivery and reduce delays by 35%.
- * Used SQL, Power BI and Google Sheets to analyze attendance, engagement, and performance trends, automate repetitive tasks, and support data-driven decisions.
- * Created and maintained operational reports and dashboards, improving data accuracy, tracking, and performance visibility across centers.
- * Built a Telegram broadcasting solution using Google Apps Script and Telegram Bot API, enabling one-click messaging across 100+ Telegram groups.

Ford Hospital And Research Center

Analyst (Operation Executive)

May 2023 – April 2024

Patna, Bihar

- * Optimized hospital operations by analyzing patient admissions, staff allocation, and resource utilization to improve scheduling efficiency, reduce patient wait times, and increase resource efficiency by 15%.
- * Managed patient billing and discount records in Google Sheets, streamlining financial workflows, reducing billing errors and ensuring accurate real-time updates across departments.
- * Extracted and analyzed hospital operational data using SQL and Advanced Excel to improve reporting accuracy, support patient care decisions, and enhance operational efficiency by 25%.

Projects

E-Commerce Sales Analytics | *SQL, Excel*

Nov 2024

- * Analyzed a dataset of 100,000 e-commerce orders for a leading Brazilian retailer, revealing key trends in customer behavior and pricing variations.
- * Utilized SQL to implement joins, subqueries, and Common Table Expressions (CTEs), enhancing data relationships across multiple sources.
- * Identified a significant 52.13% increase in sales during November, correlating with five major festive seasons, driving strategic marketing decisions

Yulu Bike Analysis EDA & Hypothesis Testing | *Python, Machine Learning*

Mar 2025

- * Performed EDA and hypothesis testing on Yulu bike rental data to analyze demand patterns and validate seasonal and weather impact on bookings.
- * Identified temperature and humidity as key demand drivers, explaining 20–30% of rental variation.
- * Validated that working days generated 35% more rentals than weekends, supporting optimized fleet allocation.

Customer Segmentation & CLV Analysis | *Domain Specific*

Sep 2025

- * Analyzed 1M+ CRM records using RFM, CLV, and outlier treatment to improve segmentation and boost campaign effectiveness by 15%.
- * Identified revenue trends to drive targeted retention strategies and increase high-value customer engagement by 25%.
- * Optimized inventory planning through order trend analysis, improving stock efficiency by 20% and reducing stockouts by 30%.

Technical Skills

Programming: Python, SQL

Libraries: Pandas, NumPy

Analytics & BI: Power BI, Advanced Excel, Google Sheets

Databases & Technologies: MySQL
